Manage MyWi-Fi

Enjoy stress-free living.

Designing Your Coverage

You'll get a color-coded Wi-Fi coverage heat map like this one, to show you how the signal is working in your home.

For your coverage analysis, we place these Air Scouts throughout your home to design your new network, or improve your current Wi-Fi signal.

What we do.

First, We'll Test Your Wi-Fi Signal

We'll bring our wi-fi Air Scouts and measure your current wi-fi, or design new coverage. You'll get a custom coverage report to let us know where to place equipment and where to boost your signal.

Dead or slow zones will be gone!

Next, We Manage Your Wi-Fi

We'll set up our equipment using your coverage report, and make sure all your devices are connected and working as fast as they are capable of.

From now on, we'll take care of everything. You are carefree.

Blanket coverage.

Complete Whole-Home Wi-Fi

Ever wonder why it's tough to make all your devices work fast & reliably in every room? End the guessing game and get total coverage with Manage MyWi-Fi.

Fast connections.

All Your Devices

Optimize speed for what you do on the internet, and for how many things you connect. We'll do the work.

Save money.

Worry-Free Replacement

You'll never again have to shell out hundreds of dollars to get an effective Wi-Fi network.

Get safety.

Security & Firewall Protections

Keep your personal information and devices safe.

Save time.

We Manage Your Wi-Fi

When it's slow or not working, you just need it to work! We'll manage your Wi-Fi from our office so you never have to lift a finger. It's hassle free!

Manage MyWi-Fi \$6.95/mo*

*Manage MyWi-Fi works in conjunction with your West Central internet service.
